Career Objective:

Looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

Experience:

System Engineer (TCS Digital)

Tata Consultancy Services (TCS)

Sept, 2018 – Present (3 Years)

I am supporting a life sciences project for one of the largest pharmaceutical client in the US. I am primarily looking after a large scale database and the web applications. I am involved in the development of web applications for the client and the ad hoc activities for the project support.

Skills:

Backend: Node.js, .Net C#

Frontend: React.js, Handlebars

Cloud Technologies: Heroku, Contentful

Tools: VS Code, Visual Studio, GitHub, Postman, HP ALM, ServiceNow, Google Analytics

Databases: Microsoft SQL Server, PostgreSQL

Visualization tools: PowerBI, Tableau

Projects:

1) Failsafe Dashboard

It is a console applications that fetches the data from different sources like Google Analytics, SQL database, performs the transformations and stores the data back in SQL database. Over this data Tableau visualizations are created for the business users.

Tools and technologies: C#, Google Analytics APIs, MSSQL

2) MTTR Calculator

It's a web and desktop application to calculate the MTTR (Mean Time to Resolution) of the incidents reported on ServiceNow for the chosen time period and teams. Around 10-15 teams benefitted from the tools saving them 8-10 Hrs. of work monthly.

Tools and technologies: C#, HTML/CSS/Javascript/Jquery, ServiceNow API

3) WSR generator

It's a console application to generate Weekly Status Report (WSR) PowerPoint presentation automatically from the ServiceNow Incidents, Service requests, Change requests, CAPA, etc.

Tools and technologies: C#, ServiceNow API

4) E-commerce website

It's a clothing website to preorder the merchandise and notify the users via mail and text when the order is ready to be picked up.

Tools and technologies: React.js, AWS, Heroku

Academic Qualifications:

Qualification	College/Institution	Year	Grades
B.E. (Computer Science)	Government Engineering College, Aurangabad	2014-2018	81.6
H.S.C.	Dr. Ambedkar College, Nagpur	2012-2014	86.31
S.S.C.	Sushil Himmat Singka Vidyalaya, Wardha	2010-2012	94.00

Other Projects:**1) FEEL SURKSHIT – An android application for safety of an Individual**

Feel Surkshit is an android application which helps a person of any age group in case he/she is attacked by someone. Also it can be used in case of accidents as an emergency signal.

2) Network sniffer

It is an application which provides an interface for network packet capture. It is able to analyze the type of packets being transmitted on the network. I have used jpcap and winpcap JAVA libraries to create the sniffer.

3) Desktop and Android Application for height of instrument calculation

It is an application which is primarily used by civil engineers and professionals to calculate reduced levels of various points on the surface of earth. It reduces overhead of manual calculations. The result of the calculation is exported into a pdf file.
